

Sleeve length from centre of back neck to wrist

*Overall length from centre of back neck to length required

For safety on staircases etc. we advise a minimum of 15 cms from the ground our *measurements generally take this into account but please check this when ordering.

The sizes set down below show our standard measurements. If you require anything different please state this when ordering. To take a length or sleeve measurement please always start from the centre of the back neck. (see drawing above)

The body width of our robes allow for ease of movement and comfort, this is not a fitted garment.

All measurements are in centimetres.

Please use this size chart to check your size.
